

Premise Advancements

Proven Technology

Clinically proven Premise trimodal composite has received a Four-Star #1 REALITY'S CHOICE award for hybrids two consecutive years. This unique material is recognized for its high-gloss polish, outstanding mechanical strength and ease of handling. With its 84% filler load, shrinkage is minimized to a low of 1.6% – up to 45% less than other composites.

Whether you choose to use a flowable or universal restorative composite, Premise delivers the handling and esthetic results you and your patients deserve.
