SECTION 10**Stability and Reactivity**

Stability: Stable.

10.1 Conditions to avoid: None.

10.2 Materials to avoid (incompatibility): Hydrofluoric acid, in which silica will dissolve and produce the corrosive gas silicon tetra-fluoride.

10.3 Hazardous decomposition products: Not available.

Other precautions:

Hazardous Polymerization Products: Will not occur.

Safety significance in case of change in physical appearance: Moisture and water will cause the product to harden and therefore be unusable.

Stabilizers: Product is not stabilized.

SECTION 11**Toxicological Information**CMR effects (Carcinogenicity, Mutagenicity and toxicity for reproduction):

Possible. See comments under "Effects for prolonged exposure".

Effects and hazards of eye contact: May cause irritation.

Effects and hazards of skin contact: May cause dry feeling on skin.

Effects and hazards of Inhalation (Breathing): Prolonged exposure to inhalable crystalline silica may cause chronic lung injury (silicosis). Acute developing silicosis may occur in a short time in heavy exposure. Silicosis is a form of disabling pulmonary fibrosis which can be progressive and may lead to death. The International Agency for Research on Cancer (IARC) reports sufficient evidence of the carcinogenicity of crystalline silica to humans (IARC group 1). Kerr Corporation accepts no responsibility and disclaims all liability for harmful health effects and customers must comply with all applicable health and safety regulations relating to the safe handling of our silica-containing products.

Effects and hazards of Ingestion (Swallowing): Hardens when wetted and, if ingested, may result in an obstruction.

Effects for prolonged Exposure: Silicosis – see "effects for inhalation".

Toxic-kinetic effects: Not available.

Effects on metabolism: Not available.
